Blockchain, Token Economy and Regulation

Lunch time talk - EFTA Court
June 19th 2019
Dr. Thomas Dünser
Personal Background

• 2019-....: Director of the Office for Financial Market Innovation

• Project Leader of «Blockchain-Act»

• 2013-2019: Senior Advisor to the Prime Minister of Liechtenstein

• Before: Private Sector (Banking, Industry, Consulting)

• MSc. and PhD in Engineering (ETH Zurich)
Office for Financial Market Innovation

- Dynamical technological developments vs. statical, backward looking regulation

- Since 2013: Innovation Framework ([www.impuls-liechtenstein.li](http://www.impuls-liechtenstein.li)) => ability of government and authorities to cope with private sector innovation
  - Regulatory Lab (Financial Market Authority FMA)
  - Bottom Up innovation process for the business framework

- Role of SFI (Office for Financial Market Innovation)
  - to foster the innovation framework
  - first point of contact for innovative companies
  - development of the business framework (Financial Market)
Use of Blockchain?

- Digital information is easily copied

- Blockchain makes possible that digital information belongs to one person and may be transferred from one person to another

- Blockchain makes the «digital original document» possible
Distributed Ledger Technology (Blockchain)

• A transaction ledger that is secured by
  – Distribution on many computers (decentralized)
  – Cryptography
  – Verification Algorithms

• DLT allows to
  – secure digital information
  – link digital information to an address
  – securely transfer digital information to another address
Distributed Ledger Technology (Blockchain)

• Key Aspects
  – Integrity and trustworthyness without intermediary
  – direct and fast transactions
  – low transaction costs
  – some Blockchains have a high energy consumption
  – some Blockchains have low transaction capacity

• Example of Blockchains:
  – Bitcoin, Ethereum, Ripple, Monero, Hyperledger, aeternity
Current Use of «Token»

- Security Token
- Digital Euro Stable Coin
- Utility Token
- Cryptocurrency Crypto-Asset

Token = functional, not technical
Current Applications of Token

- Cryptocurrency
- Utility Coin
- Stable Coin
- Security Token
- ICO
- Payment
- Trading Platforms
- Private Investment
- Financial Services

Security Token (STO)
Use Case: Tokenization of physical items

Digital Economy
- proof of ownership
- digital contract
- selling transactions
- lombard loan
- portfolio management
- insurance
- transportation chain

Property Right
Exhibition Right
Pledge Right
Copyright
How does it work?
«Pledge Right Contract»

Token with:
- Ownership rights
- Proof of ownership
- Proof of origin
- Proof of value

«pledge right» Token

Digital contract

«currency» Token
Use Case: Real Estate

- Property Right
- Usage Right
- Pledge Right

Digital Economy
- proof of ownership
- mortgage loan
- rental contract
- warranty
- access rights
Use Case: Car

Property Right

Usage Right

Pledge Right

Digital Economy
- leasing
- car sharing
- car rental
- insurance
- car investments
- theft control
Use Case: Digital Beer Voucher

Digital Economy
- Festival
- Restaurant
- Bar
Functional Overview over Token Economy

- Token Creation
- Custody
- Transfer
- Public Sale of Token
- General Economic Services
- Further Financial Services

- Metals
- Real Estate
- Raws
- Items
- Patents
- Music rights
- Trade Marks
- Software rights
- Machines
- Development Aid
- Beer Voucher
- «Bitcoin»
- Crypto Exchange
- ICO
- (EMPTY) Utility Coins
- Security
- Currency
<table>

- Items
- Patents
- Music rights
- Trade Marks
- Software rights
- Machines
- Development Aid
- «Beer Voucher»
Role of Service Providers

Private
- peer to peer transaction
- self deposit
- self programming

Service Providers
- Token Exchange Platforms
- Wallet-Provider Cold Storage Provider
- Token Creator

Transfer

Deposit

Creation
Role of financial services

- Share
- Bond
- Share
- Share
- Derivative
- Bond
- Wallet Property Right
- Transaction Right
- Portfolio Management Right
- Wallet Pledge Right

- Order
- Mandate
- Lombard Loan

- Trader
- Asset Manager
- Bank
Role of financial service providers: fragmentation of the value chain

Token Creation
Public Sale of Token
Token Transfer
Deposit
Exchanges
Wallet
Trading Services
Asset Management
Credit Business
Insurance Business
Fund Business
Legal classification of Token

Cryptomoney

Crypto-Asset

Representation of a right
«Token Container Model»

Currency
Security
Voucher
Warranty
Car
(EMPTY)

Representation of a Right on a Blockchain-System

«Right»
Legal perspective on Token

• from a technical perspective, a Token is only digital information («1001100111»)
• character of an item (transferable, ownership...)
• not a physical item (FL - Property law (Sachenrecht) is not appropriate)

=> Token is introduced as a new legal element in Liechtenstein legal framework

“Token”: a piece of information on a TT System which:
1. can represent claims or rights of memberships against a person, rights to property, or other absolute or relative rights; and
2. is assigned to one or more TT Identifiers;
Token and «real world»

**Real World**

- **share**
  - legal transfer
  - share registry
  - limitations
  - voting rights
- **real estate**
  - land registry
  - limitations
- **physical item**
  - legal ownership
  - transfer
  - ...

**Blockchain-System**

- **role of token «owner»**
  - is he/she the legal owner of the right?
- **legal effect of Token transfer**
  - is the new owner the legal owner of the right?
- **Restriction of Token transfer**
  - How can a Token holder see restrictions?
  - In case of collision: which system has priority?
  - ...

Synchronisation
Fundamental questions about Token

• Can a Token be owned?
• Can a Token be «stolen»?
• Can a Token be transferred to a delegate? What are the legal implications?
• Can a Token be pledged?
• Legal protection of a Token «buyer» (good faith)
• Is it possible to cancel a Token?
• etc.
Legal Model «Disposal of Token»

- Person entitled to dispose of the Token
- Delegate of the entitled person
- Holder of the TT-Key

TT-Key
- «Private Key»
- «Public Key»

TT-Identifier

Representation of right
- Security
- Music licence right
- Shop voucher
- Guarantee right
- Right to withdraw EUR
- Ownership of property
- (NOTHING)
Token- and TT-Service Provider Act: Civil basis

- Art. 5: Power of Disposal and Right of Disposal
- Art. 6: Disposal over Tokens
- Art. 7: Effects of Disposal
- Art. 8: Legitimacy and exemption
- Art. 9: Acquisition in Good Faith
- Art. 10: Cancellation of Tokens
Article 5

Power of Disposal and Right of Disposal

1) The TT key holder has the power of disposal over the Token.
2) It is further assumed that the person possessing the power of Token disposal also has the right to dispose of the Token. For every previous holder of the power of disposal, it is presumed that he was the person possessing the right of disposal at the time of his ownership.
3) If someone is the holder of a power of disposal without wanting to be the person possessing the right of disposal, he can rely on the person from whom he received the Token in good faith is the person possessing the right of disposal.
Article 6

Disposal over Tokens

1) Disposal is:
   a) the transfer of the right of disposal over the Token; or
   b) the justification of a securities or a right of usufruct to a Token.

2) Disposal over a Token requires that:
   a) the transfer of the Token is concluded in line with the regulations of the TT System
      where a restricted in rem right to a Token can also be ordered without transfer, if this
      is apparent to third parties and clearly establishes the time of ordering;
   b) the transferring party and the receiving party unanimously declare to transfer the right
      of disposal over the Token, or that they want to justify a restricted in rem right;
   c) the transferring party is the person possessing the right of disposal pursuant to article
      5; article 9 remains unaffected.

3) If a Token is disposed of without reason or a subsequent reason fails to exist, the revocation
   shall be accomplished in accordance with the provisions of the Enrichment Law (sections 1431 et
   seq. ABGB).
Delegation: Role of Service Providers

**Model 1:** Deposit directly by the Person entitled to dispose of the Token

- «Right»
- TT-Identifier
- TT-Key
- 

**Model 2:** Deposit of Private Keys by Professional Service Provider

- «Right»
- TT-Identifier
- TT-Key
- «TT-Key-Depositary»

**Model 3:** Deposit of Tokens by Professional Service Provider

- «Right»
- TT-Identifier
- TT-Key
- «TT-Token-Depositary»

TT-Identifier and TT-Key are used in the context of tokenization, allowing for secure handling and delegation of access rights.
Legal questions relating to delegation

- Case of Bankruptcy: What happens with Tokens and TT-Keys hold for a client? Are they part of the delegate’s own assets?
- What happens in case the delegate uses the Token in another way than agreed? (Misuse of the power of disposal)
- What legal proceedings are open to the entitled person?
- The delegate has the full power of disposal!

Token and TT-Service Provider Act:
- Regulation of Token- and TT-Key Depositary
- Duty to clear separation of clients and own assets
- Legal clarifications about the roles («right to dispose» and «power of disposal»)
Tokenization of physical items

- Authenticity?
- Value?
- Origin (Criminal background)?

EUR 800 Mio.

Token Economy
- Is he really the owner?
- Is the painting really available?
- does the token really represents the property right?
- Is the Token well programmed?
- Am I really the legal owner of the painting after having bought the Token?
Tokenization of physical items

Physical Validator
- Interface between «real» world and blockchain
- Ensures that the asset really is available

Token
- Proof of Authenticity
- Proof of Origin
- Estimation of Value

Token Generator
- Technical Correctness
- Representation of right
### Overview over the «Blockchain-Act»

Status and Outlook

• Token und TT Service Provider Act TVTG
  – First Reading of the Act by the Parliament has taken place in June 2019
  – Second Reading is planned in October 2019
  – Entry into force is planned on: Dec. 2019 / Jan. 2020

• Important Milestone
  – Legal Certainty for Token Economy
  – Guidelines for business activity
  – first step in a major development (digitalization)

• Ability to innovate will be crucial also for states

• Know-how about digitalization / technology in all state functions will be important
Thank you for your attention
